## SUMMARY

---

I am a frontend web developer looking to transition my career from teaching chemistry to programming. Having difficulty discovering my passion and dream job at work, I finally realized that programming is what I am truly passionate about. Creating stunning, interactive, and user-friendly websites through writing code motivates me as I aim to impress and engage users with my work. I am eager to expand my knowledge, enhance my skills, and strive for greater success. I want to become an intern frontend web developer at your company to contribute my best efforts in learning, motivating, and helping the company reach its goals.
